HEALTHY INTERIORS PROGRAM
Creating Healthy And Safe Interior Environments

Creating Sustainable and Healthy Interior Environments

At **AmTab**, we take our commitment to sustainability, health, and safety seriously; we understand the importance of providing healthy and safe interior environments. Our “Healthy Interiors Program” is a comprehensive approach to creating healthy and safe interior environments that emphasize the importance of incorporating sustainable and environmentally friendly materials and methods.

Promoting Healthier Indoor Environments Through Quality Furniture and *Signage, Graphics, and Decor*

We are dedicated to providing high-quality Furniture and *Signage, Graphics, and Decor* that not only meets the needs of our clients but also promotes a healthier indoor environment. We believe that everyone deserves to work and learn in a healthy and safe indoor environment; our program is designed to achieve this by incorporating a variety of materials that meet the highest standards for sustainability, health, and safety.

Leigh Christian
Fort Smith Public Schools

I love AmTab's furniture! It's durable, comfortable, and easy to clean. Plus, the company's commitment to sustainability is truly impressive.

Chris Minor
Mercer County Schools

AmTab's signage is top-notch. We recently had them create custom signs for our school, and they turned out beautifully. The graphics were crisp and the colors were vibrant.

Jennifer Kapinus
North Crawford School District

We love how easy it is to clean AmTab's furniture. With kids constantly spilling and making messes, it's important to have furniture that can withstand heavy use and still look great.

Rachelle Wuellner
Bunker Hill CUSD 8

We highly recommend AmTab's furniture, signage, graphics, and decor. Their commitment to quality and easy cleaning is unmatched in the industry. Our school looks better than ever, thanks to AmTab's exceptional products.

Stephanie Bruce
Pennfield Middle School

The custom signage and graphics that AmTab created for us have made a huge impact on our brand. We've received so many compliments on our new look, and it's all thanks to AmTab's exceptional work.

Scott Anderson
Madison County Schools

The easy cleaning of AmTab's furniture has been a game-changer for us. We no longer have to spend hours scrubbing stains out of our chairs and tables. The durability of their products is impressive as well.

Metal: Durable and Safe

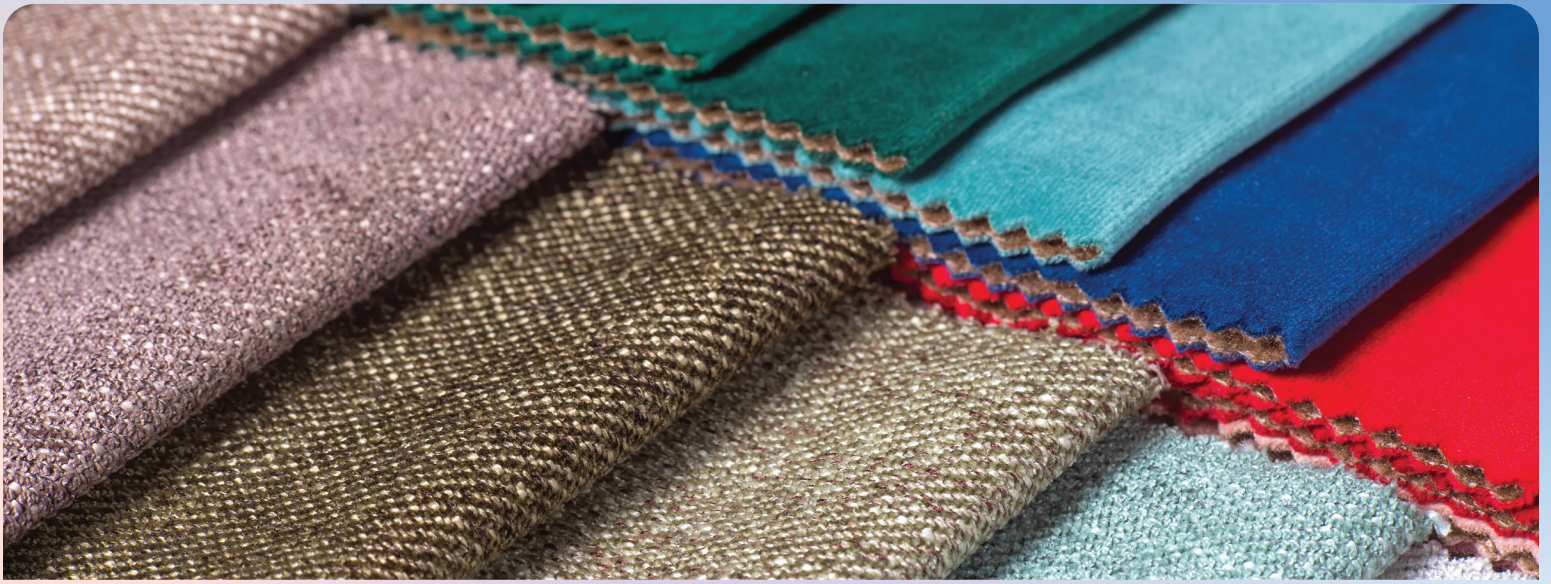

- Our metal components are made from high-quality materials that are durable and long-lasting and specially made for our durable Biophilic Furniture.
- A portion of our steel components use recycled steel, which helps reduce the environmental impact of our manufacturing process; this means that along with being safe our products are also sustainable.
- Our metals are free from harmful chemicals such as lead and mercury, making them safe for use in schools; we believe that our products should not only be functional but also safe for the environment.
- We use a powder-coating process that is PFAS-free and does not emit harmful volatile organic compounds (VOCs), ensuring that the air in the cafeteria remains healthy. Our products are not only safe for the environment but also for the people using them.
- Our metal components are easy to clean and maintain, ensuring that they remain hygienic and free from harmful bacteria.
- We also offer a chrome plated finish to our metal components, which provides several benefits. This process makes the metal resistant to corrosion, which means it lasts longer reducing replacement waste. In addition to being hygienic, it provides a durable and attractive finish that is ideal for high-traffic areas like school cafeterias.

Wood: Sustainable and Hygienic

- Our wood components are made from Forest Stewardship Council (FSC) certified wood. This certification ensures that our wood comes from responsibly managed forests that protect biodiversity and the rights of forest workers; taking into account the ecological, social, and economic aspects of forest management. We are committed to sustainable practices that benefit both the environment and the people working in it.
- We use low-emitting adhesives and coatings that are free from harmful chemicals, ensuring that the air in the cafeteria remains healthy. Our commitment to sustainability is not limited to the sourcing of our materials but also extends to our manufacturing process.
- AmTab's wood components are easy to clean and maintain, ensuring that they remain hygienic and free from harmful bacteria. We understand the importance of hygiene, especially in environments like school cafeterias or any school Biophilic Learning Environments.
- Our wood components are designed to be durable and long-lasting, reducing the need for frequent replacements and minimizing waste. These wood components help ensure that our Biophilic Chairs, Biophilic Desks, Biophilic Tables, and our other Biophilic Seating will be long lasting for years to come. We believe that sustainability is not just about sourcing materials responsibly but also about designing products that are built to last.

Fabric: Elegant and Healthy

- Our fabric components are made from low-emitting materials that are free from harmful chemicals such as formaldehyde and phthalates. This means that our products are safe for use in environments where children spend a significant amount of time.

- We use fabrics that are certified by Greenguard, a leading organization that sets standards for indoor air quality.

This certification ensures that our fabric meet rigorous standards for low chemical emissions, promoting a healthier indoor environment. We understand that indoor air quality is a crucial aspect of creating a healthy environment.

- Our fabrics are designed to be easy to clean and maintain, ensuring that they remain hygienic and free from harmful bacteria.
- **AmTab's** upholstered pieces are resistant to water, stains, and fading, making them perfect for high-traffic areas like school cafeterias or school Biophilic Learning Environments.
- Our fabrics are available in a wide range of colors and patterns, allowing our clients to customize their cafeteria furniture to match their school's decor. We believe that functionality and safety does not need to come at the expense of aesthetics.

Laminate: Classic and Long-Lasting

- Our Biophilic Laminate table tops have a non-porous surface that resists the growth of bacteria, viruses, and other microorganisms.
- They are also hypoallergenic and do not trap dust or other allergens, which can be beneficial for individuals with allergies or respiratory issues.
- Our Biophilic Laminate tops require minimal maintenance being resistant to stains while also easy to clean and sanitize as they do not require any special cleaning products or treatments.
- A portion of the material used in producing our Laminates come from post-consumer recycled products, such as recycled paper or wood fibers, making them a sustainable choice for environmentally conscious consumers.
- Our Biophilic Laminate table tops have been designed to withstand an extensive range of impacts and resist scratches, which underscores their exceptional strength and durability, making them an outstanding choice for high-traffic areas.
- Biophilic Laminate table tops are available in a wide range of colors, patterns, and textures, making it easy to find one that complements your decor. With the additional option to create custom designs or logos, these table tops can complete any vision.

DELUXE STOOL

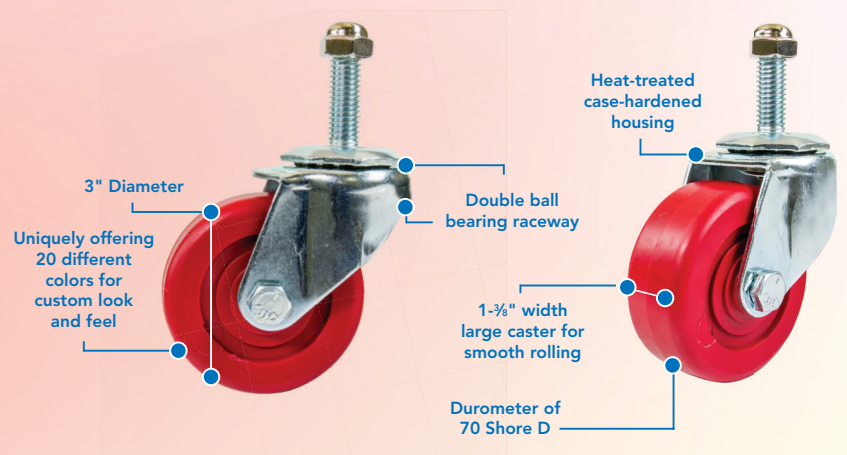

Deluxe Stools: Colorful and Solid

- **AmTab's** Deluxe Stools are made of ABS (Acrylonitrile Butadiene Styrene), which is a type of thermoplastic material which is highly durable and resistant to impact, making them much less likely to crack or break than other materials
- This material does not contain harmful chemicals like phthalates or bisphenol A (BPA) that can cause health problems. Being non-toxic makes our Deluxe Stools a healthier choice for indoor environments, particularly in spaces where people spend a lot of time.
- Our Deluxe Stools are remarkably easy to clean and maintain. The smooth surface of the stool means that there are no cracks or crevices where dirt or grime can accumulate, making it easier to keep the stool clean and hygienic. These stools are also non-porous, which means that it does not absorb liquids or dirt, making it less likely to harbor bacteria or other pathogens.
- Our Deluxe Stools can be either round or rectangular and are larger than the industry standard with a higher weight capacity and can be color customized to match a design plan. Being able to pick from 20 different colors for the top section of the stool as well as the bottom section means there are 400 different variety of stools available.

DynaRock: Clean and Rugged

- DynaRock™ Edges are comprised of a strong, durable material that is highly resistant to impact, abrasion, and scratches, making them much less likely to chip or crack than other types of table edges; meaning that there are fewer sharp edges that could potentially cause injury, making these edges a safer option as well.
- These edges are also waterproof, which makes them highly resistant to moisture damage from spills and other sources of water damage. Moreover, because they do not absorb liquids or dirt, these edges are less likely to harbor bacteria or other pathogens.
- DynaRock™ Edges are made from a non-toxic material and does not contain harmful chemicals like formaldehyde or volatile organic compounds (VOCs) that can cause respiratory irritation or other health problems; making it a healthier choice for indoor environments.
- Another feature of these table edges is that they are easy to clean and maintain, the smooth surface of the edge means that there are no cracks or crevices where dirt or grime can accumulate. The ease by which these tables are kept hygienic makes them ideal for tables that are used frequently or in high traffic areas.
- Our DynaRock™ Edges can be customized to add accent color to a table top. With multiple color options available the table's edge can help bring a design together.
- Due to their durability, our DynaRock™ Edges will withstand the wear and tear of constant use increasing the longevity of the table thereby reducing waste and saving money in the long-term.

Wheels: Colorful and Secure

- The Wheels utilized by **AmTab** have a moderate amount of flexibility and elasticity which can help absorb shock and vibrations from uneven surfaces, reducing the risk of injury to people and damage to furniture.
- **AmTab's** wheels are designed to provide smooth rolling on most surfaces which will help prevent accidents as well as result in a reduction in the noise created when moving furniture.
- Our wheels are highly durable and resistant to wear and tear, punctures, and abrasion, which extends their lifespan and reduces waste from frequent replacements. Their strength also enables them to support heavy loads and distribute weight evenly, preventing tipping and instability that could cause accidents or injuries.

Glides: Stable and Effortless

- AmTab's DynaGrip™ Glides feature a unique design and construction that maximizes stability, security and safety of our tables.
- DynaGrip™ Glides utilize a Spring Steel mechanism and Internal Washer to ensure that our glides are firmly latched onto the steel legs in order to offer the best protection against accidents and injuries. Detachment of a poorly designed or manufactured glide can cause dents and scratches on the floor as well as compromise the safety of the table.
- Our glides have a Durometer hardness rating of 70 Shore A, which provides a good balance between stability and shock absorption, while also being durable and long-lasting. The stability increases the comfort the tables provide, the shock absorption helps reduce the noise level in the space, while the longevity reduces waste and the need for replacements.

Patented DynaGrip™ Glides with a Durometer of 70 Shore A

Spring Steel Mechanism to Firmly Grasp Tube

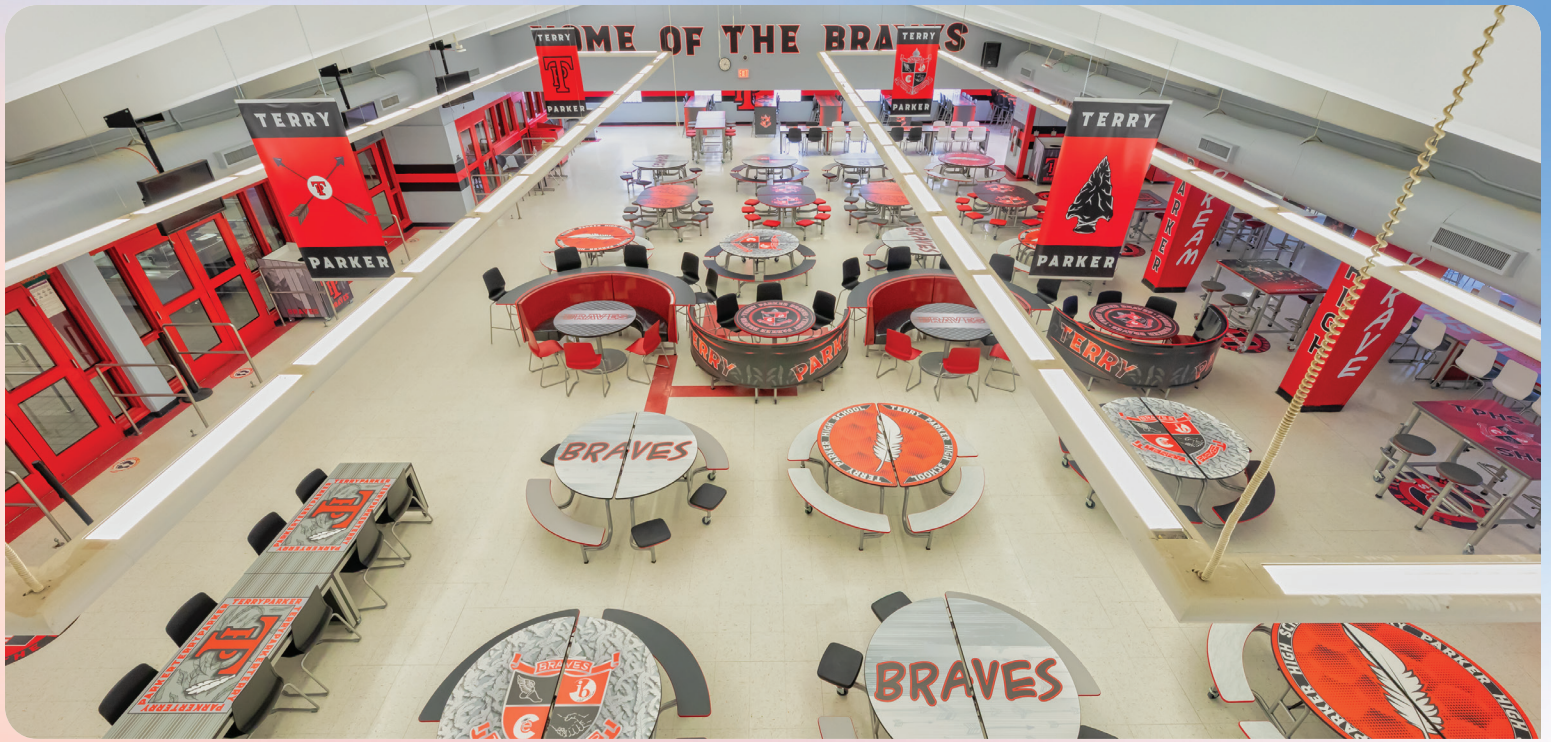

Round DynaGrip™ Glide

Internal Washer for Steel to Steel Protection

Hardware: Modern and Reliable

- At **AmTab** we prioritize the safety and security of our products and the people around them. To achieve this, we use high-quality ancillary hardware such as airline cables and grommets, which provide strength and flexibility to handle any project with confidence.
- Regardless of the application or material of the piece we are mounting, we have flexible hardware that offers easy and hassle-free installation, which will save time and reduce the risk of errors or mistakes that could compromise safety.
- While keeping safety in mind, we do not lose sight on the aesthetic appeal. Though the use of hardware like Z-Clips and Caps, we ensure the fixtures remain affixed in place while keeping the hardware hidden to no detract from the design vision that was created. These hardware ensures that our Biophilic Signage Graphics and Decor will be secure and remain in place for a long time.

A Comprehensive Approach to Creating Healthy and Safe Indoor Environments

At **AmTab**, we strive for continuous improvement in all aspects of our operations. This includes regularly evaluating our products and processes to identify ways to incorporate more sustainable and environmentally friendly materials and methods. By doing so, we aim to help our clients create healthier and safer indoor environments for their organizations.

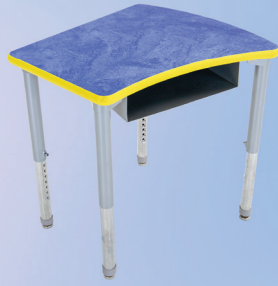

We are delighted to have been approved by MAS Certified Green, a leading organization that promotes sustainability and environmental responsibility in the furniture industry. This independent certification confirms that our products meet the highest standards for sustainability, health, and safety. We are proud to have earned this recognition and will continue to work towards our commitment to sustainability and environmental responsibility.

Our "Healthy Interiors Program" is designed to guarantee that we provide high-quality furniture that promotes a healthy and safe indoor environments; the materials and processes we employ ensures air quality remains high thereby reducing the risk respiratory problems and allergic reactions. We are committed to continuous improvement and have been certified by MAS Green, FSC, and Greenguard, confirming that our products meet the highest standards for sustainability and environmental responsibility. We firmly believe in using our products to making a positive impact on the communities we serve; our clients can create a healthier and safer indoor environment for their students and staff.
